Muda Packaging Industries Sdn Bhd, Malaysia

Where Every Advantage Counts

As a pioneer in the paper milling and packaging industry, Muda Holding Berhad (MUDA) manufactures high grade industrial brown paper, paper boards, corrugated boxes, multi-wall paper bags, PE laminated paper for industrial and food application, flat, satchel and self-opening-style paper bags for food and non-food retail outlets, paper pallets and honeycomb for packaging and furniture industries, paper-based stationery, trades in imported paper and paper related products for the domestic and export market.

Operating in an environment that calls for the best technology and top know-how requires a complex system that is capable of handling the most demanding needs of its clients. For instance, MUDA recycles more than 400,000 metric tones of wastepaper per annum, requiring a solution that is total and reliable with no margin for error.

Which is why MPI (a subsidiary of MUDA) places their trust on Prestige Atlantic's CPS/Enterprise, a total integrated enterprise management software. For over 10 years, the CPS/ Enterprise has helped MPI handle its processes from start to end; from tracking sales to counting costs, from controlling inventory to warehouse processing.

Now, MPI once again calls for the expertise of Prestige Atlantic to upgrade the CPS/ Enterprise to version 2010. By continuing to place its trust in the CPS/ Enterprise, MPI's mandate is clear: to take business to the next level; a challenge we at Prestige Atlantic is honoured to accept and meet to much satisfaction.

Among others, by upgrading its existing server to the state of the art HP RX2660, MPI can now cut down processing time and at the same time enhance speed across departments. Already satisfied with the current host of benefits, an upgrade gives MPI yet another leverage to put itself ahead of others. With a new feature that uses Graphical User Interface, the software is more user friendly, enabling even non-tech savvy users to do what was previously impossible, such as printing and downloading data onto an Excel sheet. Benefits such as these give much ease of use, and enable MPI to keep itself up to date and to maximize its potential.

With **CPS/ Enterprise**, it's all about giving you control.

With faster processing, comes faster delivery to MPI's customers. In an industry where speed counts, faster processing means that MPI is able to engage with its customers at every level to fulfill and surpass their expectations.

Prestige Atlantic Asia Sdn Bhd (892260-U)

We offer a broad-spectrum solution for paper & packaging industry

Beijing KSPA Resources Recycling Co. Ltd, China

Managing Many Centers Under One System

As a company expands its frontiers, keeping a tight grip on all its businesses is very challenging. The ability to govern not just major, but minor processes, and to detect slight changes in the business environment is crucial for any company looking to expand. And who would understand this better than Beijing KSPA Resources Recycling Co. Ltd?

As one of the largest waste paper collection company in Malaysia, KS Secondary Fibre Supplier runs more than 10 collection centres all across the country. With its base in Malaysia, it also has a strong foothold in Beijing and Tianjin, China. Its subsidiary in China, Beijing KSPA Resources Recycling Co. Ltd is part of the Group's expansion strategy to capture a lucrative market up in China. With 6 collection centres already running optimally and another 4 in the pipeline, the company's task of ensuring all systems go is a task few can manage effectively.

Across Beijing in Daxing, Shunyi, Hai Dian, Ying Hai, Ru Cheng and Zhao Yang, all centres run flawlessly using Prestige Atlantic's iconic e-Green. With e-Green, KSPA Beijing is able to run all collection centres under one reporting system. e-Green goes beyond a simple buy and sell operation. Designed to run the most complex inventory management, real-time connecting of all outlets into a centralized system to provide on-time accounting and management reports means that KSPA Beijing can keep a tight grip on all its centres.

Seeing 6 centres already up and running, KSPA calls for the 7th installation, further consolidating its operations under one reporting system.

With price control fluctuating unpredictably, e-Green allows KSPA to keep tight control on the pricing, allowing it to generate a healthy profit. The entire purchasing is run under one consolidated process, enabling KSPA to fine-tune its business to perfection. Each of KSPA's centre runs on a front-end engine. Transactions then auto-sync with the headquarters' back-end centralized system, allowing headquarter to better understand how its centres are performing and to take it to the next level.

Which is why with **e-Green**, it's all about simplicity.

KSPA is expected to have a total of 10 centres in the near future. e-Green is poised to surpass its expectations of running all centres flawlessly.

TCG Rengo Subang (M) Sdn Bhd, Malaysia

One Plus One Equals Three

An established name in the corrugated carton manufacturing industry, TCG Malaysia is joint venture Company between Thai Containers Group Co., Ltd. (TCG), a subsidiary of SCG Paper Public Co., Ltd., Thailand - the largest integrated producer of paper products in Thailand and Rengo Co., Ltd. Japan - the leading corrugated carton manufacturer in Japan.

Aiming to be a leading name in ASEAN in terms of innovative packaging solution, TCG Malaysia relies on Prestige Atlantic's CPS/ Enterprise to give it maximum control over all its processes from A to Z.

Taking control to the next level, TCG Malaysia once again places its confidence on Prestige Atlantic by integrating the CPS/ Enterprise into its own SAP B1 financial system. The integration of these two solutions work synergistically by enhancing the strengths of both solutions, further giving TCG Malaysia even more solid control over its processes.

With **CPS/ Enterprise**, it's all about giving you control.

This integration sees immediate positive impact on TCG Malaysia. With processing time cut down, with data more readily available to be analyzed, with clarity on where its strength lies and where it can improve, TCG Malaysia's reliance on this synergy gives it continuous advantage over others.
