TWINPACK CONTAINER, PHILIPPINES

CPS PROJECT

Twinpack is a company that operates from San Juan, Philippines. They are a market leader in their native land, running a corrugated paper packaging business.

In November 2021, Twinpack installed the **CPS Enterprise 2023** from Prestige Atlantic Asia. The package includes the entire CPS core modules like Sales, Production, Paper Roll, Material, Plant Maintenance, Warehouse and EIS. The upgrade also consists of a DECC link to corrugator machines. Twinpack also requested CPS Block Library to manage all the printing plate and die-cut block inventory systematically and Paper Roll B2B to manage B2B roll supply chain operation. Paper Suppliers like Batagas Paper, Bataan Paper, United Paper SCG, Itochu Paper, Sun Paper Taiwan etc are now fully integrated.

DAI SUWON GROUP, KLANG MALAYSIA

DSW operates from Port Klang, Malaysia. They have five joint ventures partners across the peninsular of West Malaysia. With partners responsible for quick customer service, finish-up manufacturing and Just-In-Time delivery. DSW server hosting is in Cyber Jaya, Malaysia. They have 150 user licenses for the main business operation with five partners.

In August 2021, the company upgraded to **CPS Enterprise 2023** to gain overall advancement and up-to-date CPS functionalities, especially the entire production operation, to achieve real-time production activities. DSW also rolled out the CPS B2B module called **Auto-Pass** with all suppliers across the country.

FAIRVIEW PACKAGING, MALAYSIA

Fairview Packaging operates from Hulu Langat in Selangor, Malaysia.

In May 2021, Prestige Atlantic Asia assisted in installing **CPS MiniBox 2020** running on Cloud Server hosted in Cyber Jaya Multimedia Super Corridor. The project also includes CPS MiniBox production scheduling and real-time production tracking.

MEGABOX INDUSTRIES, MELAKA

Megabox Industries operates from Ayer Keroh, Melaka. They have been an established paper packaging supplier since 1982.

In April 2021, Prestige Atlantic Asia installed the **CPS Minibox 2020**, and this project allows Megabox to manage their business operations more effectively, especially for people who are more mobile and highly connected. In addition, the project helps to promote people working from home while improving a work-less-stress environment and getting things done anytime, 24 x 7. The server hosting is in Cyber Jaya Multimedia Super Corridor.

KOTAK MALAYSIA, MELAKA

Kotak Malaysia operates from Melaka, Malaysia.

In November 2021, Prestige Atlantic Asia assisted in installing **BHS Corrugators DECC integration and BHS Stacker integration**. The project includes real-time production analysis with BHS Dashboard, running speed actual vs target, downtime analysis and waste analysis.

RENGO PACKAGING, MALAYSIA

Rengo Malaysia is part of a global packaging company with 176 plants across 26 locations across Asia, Europe and North America.

Rengo Malaysia upgraded to **CPS Enterprise 2023** as part of their ongoing improvement program, especially RF mobility system, integration to new Marquip Corrugators, getting ready to embark on more industry 4.0 projects.

MUDA PASIFIK, JOHOR

Muda Pasifik operates from Senai, Johor.

In June 2021, Prestige Atlantic Asia successfully installed the **CPS Flexo Schedule link TCY flexo** machine and Robotic arm. The project allows the planner to plan the schedule and real-time link to the machine system. The planner can still amend and pull out the job at any given time. It will also provide real-time production data such as start time, end time, OK produced, NG produced, and downtime reason to the CPS system.

PT ORIENTAL ASAHI, JAKARTA

PT OAJ operates in Jakarta and is one of the many companies under the parent company in Japan Pulp and Paper, having 22 countries worldwide.

In February 2021, Prestige Atlantic Asia successfully installed the **CPS Flexo Schedule link MHI flexo Evo 100** machine. So planners can plan in the office that automatically integrates to machine and real-time to know all flexo jobs progress and production data.

UPP PULP & PAPER, MALAYSIA

UPP is a Malaysian paper mill company that operates in Ijok, Bestari Jaya Selangor.

In July 2021, Prestige Atlantic Asia successfully installed the **PMIX FSC** module for the company. It allows the company to track FSC produced paper from customer order to production to stock to delivery.

NEW & INNOVATION PROJECT

PAA & UPM

Prestige Atlantic Asia has been collaborating with Universiti Putra Malaysia over recent years. Their students have constantly been performing well and possess immense talent in making Malaysia a good pool of talented, skilled engineers to help advance the nation's IT sector. With Prestige Atlantic Asia working on the **CPS Road Runner** project, they are constantly improving and working on projects that can bring more advancements to Malaysia. Previously, Prestige Atlantic Asia has worked with UPM on Project DragonFly. A project to do with operating drones.
