KF PAPER PRODUCTS, MELAKA

CPS ENTERPRISE 2023 PROJECT

KF Paper Products (Melaka) Sdn Bhd, established in 2008 and now a wholly-owned subsidiary of Muda Holdings Berhad, is a Melaka-based manufacturer specializing in corrugated board solutions. With over two decades of industry expertise, the company is committed to delivering innovative and sustainable packaging solutions across various sectors.

In partnership with Prestige Atlantic Asia, the implementation of **CPS 2023** drives operational enhancements and incorporates state-of-the-art technology, aligning with Industry 4.0 standards. This initiative facilitates significant cost savings and optimizes factory operations.

Prestige Atlantic Asia successfully installed the CPS + CPMS Link to Tian Long machine (1.8 and 2.2 lines). So planners can plan in the office that automatically integrates to machine and real-time to know all jobs progress and production date.

COURIER PACKAGINGS, JOHOR

CPS MINIBOX 2023 UPGRADE

Courier Packagings Sdn Bhd operates from Johor, Malaysia. The company won the Best Supplier Awards in 2015 from Sharp. They also offer various services from design to packaging made of wood, paper, metal, and plastic.

Prestige Atlantic Asia executed their **CPS MINIBOX 2023** Upgrade, integrating state-of-the-art software into their manufacturing processes to enhance operational efficiency and profitability. This strategic initiative is designed to leverage advanced technological advancements especially with Industry 4.0 capabilities to drive improved performance and increased revenue.

FocusPrint

FOCUSPRINT, SELANGOR

CPS MINIBOX 2023 UPGRADE

FocusPrint has established itself as a reputable provider of packaging solutions, specializing primarily in offset packaging, with over a decade of accomplishments in Malaysia. The company has initiated a strategic upgrade of its facilities to maintain competitiveness in the dynamic business environment.

Through a strategic partnership with Prestige Atlantic Asia, FocusPrint has successfully implemented the **CPS MINIBOX 2023** Upgrade. This cutting-edge solution, incorporating advanced Industry 4.0 technology, has enabled the company to streamline its operations, enhance efficiency, and achieve significant profitability improvements.

WEPACK ASEAN 2023 EXHIBITION

RX successfully hosted the WEPACK ASEAN event in Malaysia from November 22nd to 24th this year. The exhibition spanned over 10,000 square meters, attracting more than 200 renowned global exhibitors and over 3,000 professional buyers from Southeast Asia. It featured more than 20 on-site industry events. WEPACK's concept of encompassing the entire packaging and printing industry chain was prominently showcased, covering everything from raw materials and processing boards to packaging products and the end market. This significant industry event was meticulously organized to align with the Southeast Asian packaging and printing industry's market characteristics, integrating both upstream and downstream sectors of the industry.

Prestige Atlantic Asia made a significant impact at the event with a well-appointed booth. Their presence successfully attracted numerous visitors and generated substantial interest. The primary focus was on facilitating the transition of regional companies into the Industry 4.0 era. Prestige Atlantic Asia is poised to return shortly to showcase additional technological advancements and updates to its continually evolving software.

LHDN IMPLEMENT E-INVOICING IN MALAYSIA

The Inland Revenue Board of Malaysia (IRB) is introducing e-invoicing as part of the government's efforts to enhance efficiency, transparency, and control over tax and financial management. An e-invoice is a digital document that records transactions between a seller and a buyer, replacing traditional paper formats with electronic versions in PDF, JPEG, or DOC formats. It contains all the essential information found in traditional invoices, including buyer details, item descriptions, quantities, taxes, prices (excluding taxes), and total amounts, ensuring seamless business operations.

The implementation of **e-invoicing** will occur in three phases. Phase one will begin in August 2024 for companies with an annual revenue of RM100 million and above. Phase two will follow in January 2025 for companies with an annual revenue between RM25 million to RM100 million. By July 2025, all remaining companies in Malaysia will be required to comply with this system.

To support this government initiative, Prestige Alantic Asia will **integrate MYINVOIS into the CPS system**. This ensures full compliance with e-invoicing guidelines and facilitates smooth, uninterrupted business operations in the years ahead.

LA PRINT CO., LTD (VIETNAM)

CPS ROLL PRE-PRINT

Roll Pre-Print plays a pivotal role in producing high-quality, visually appealing corrugated packaging that not only looks impressive but also offers cost savings. It provides customers with an aesthetically pleasing package that enhances brand perception and consumer appeal.

Roll Pre-Printing offers a cost-effective solution for manufacturing corrugated packaging with superior visual quality. The advanced aesthetics and print capabilities can significantly elevate brand image and increase consumer preference.

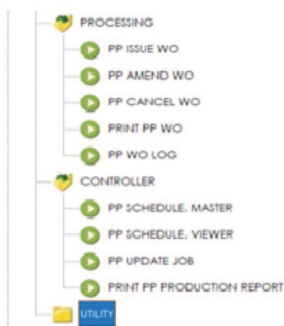

Typically, Roll Pre-Print orders start at 10,000 boxes or more. It offers greater color flexibility, accommodating up to 7 colors or more compared to the 4 colors available with traditional Flexo machines. Additionally, Pre-Print technology enhances print lines, delivering a resolution of 133 to 150 lines, far exceeding the 60 to 100 lines achievable by Flexo machines. Furthermore, with Roll Pre-Print, the GSM (grams per square meter) can be reduced to 150, compared to the 175 GSM commonly required by Flexo machines, making it a more efficient and competitive option.

With its vibrant colors, increased print resolution, lower GSM weight, and competitive pricing, Roll Pre-Print is an ideal choice for businesses looking to boost sales and enhance the customer experience. By offering a visually superior and cost-effective packaging solution, switching to Roll Pre-Print can give your products the edge they need in the marketplace.

Now is the perfect time to make the switch to Roll Pre-Print and deliver packaging that stands out and appeals to consumers.

Prestige Atlantic Asia is committed to supporting your seamless transition to **Pre-Print technology**. Our team of experts will work closely with you throughout the implementation process, ensuring minimal disruption to your operations and providing timely assistance whenever needed.
